SONASCREEN® 2

The most advanced acoustic camera on the market

Areas of application

Leak detection, partial discharge detection, tightness testing, and bio-acoustics

Most sensitive camera available

176 microphones with 200 kHz for capturing acoustic signals

Wide frequency range

Up to 100 kHz for the detection of audible and ultrasonic signals

High acoustic frame rate

Capture fast events with a frame rate of 100 fps

Intuitive operation

Different application modes with preset settings for intuitive operation without extensive training

Audio converting

For precise monitoring of the visually displayed ultrasonic signal

In-depth recording and analysis

The only camera that enables further processing of the recorded raw data

Flashlight function

2-in-1 device

Acoustic camera and thermal imaging camera in one device

Touch display

7" multi-touch display with very high resolution

GPS module

For easy positioning and orientation during partial discharge measurements*

IP54 protection class

Ideally suited for both indoor and outdoor industrial applications

Any technician can use

SIMPLE

Visual presentation of defects

INTUITIVE

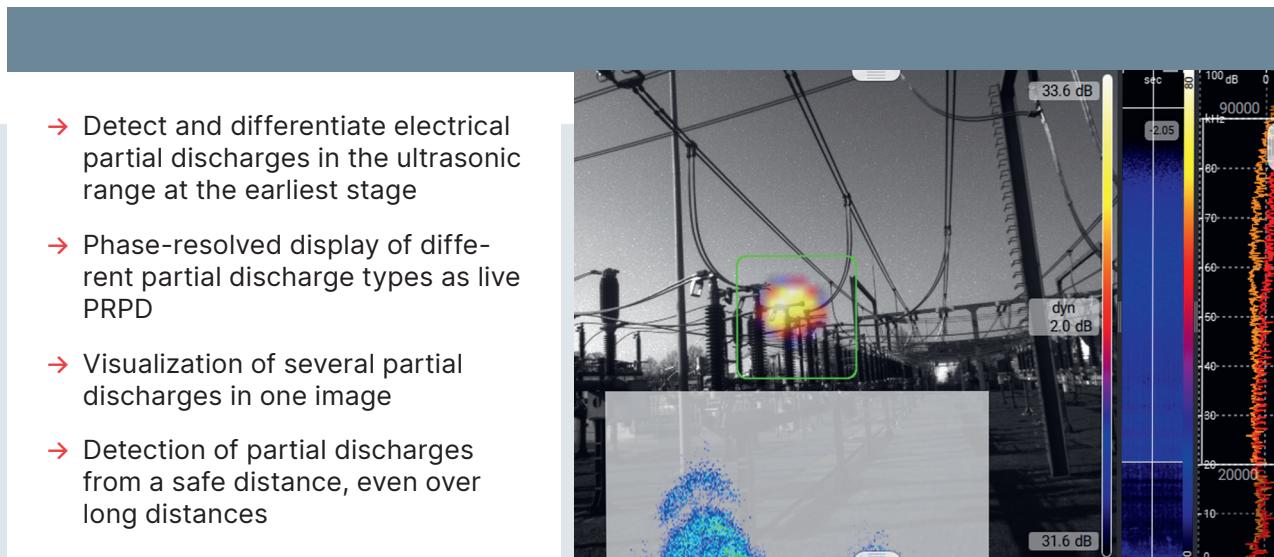

Real-time acoustic results at 100 frames per second

FAST

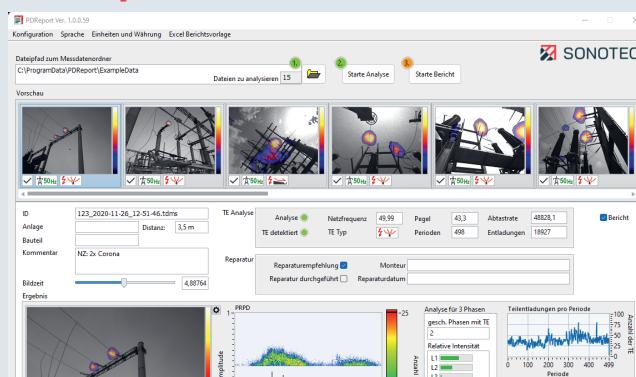

Detection of Partial Discharges

Increase your operational safety and system reliability!

- Detect and differentiate electrical partial discharges in the ultrasonic range at the earliest stage
- Phase-resolved display of different partial discharge types as live PRPD
- Visualization of several partial discharges in one image
- Detection of partial discharges from a safe distance, even over long distances

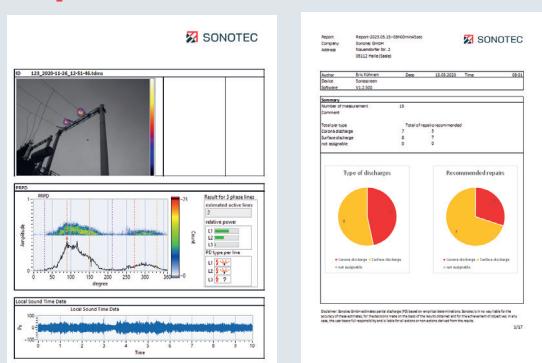

PDReport Software

- Free software for the analysis and rating of electrical partial discharges
- Automatic line frequency detection
- Export as PDF

Reports

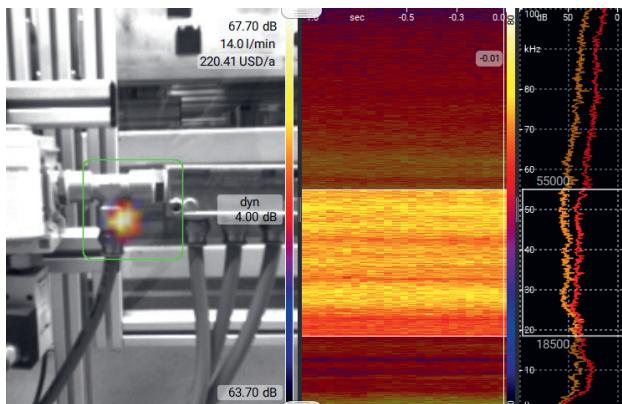

- Documentation of defects and creation of repair orders
- Automatic differentiation between corona and surface partial discharge
- Display of the acoustic signal as PRPD

SONASCREEN® 2 Acoustic Camera

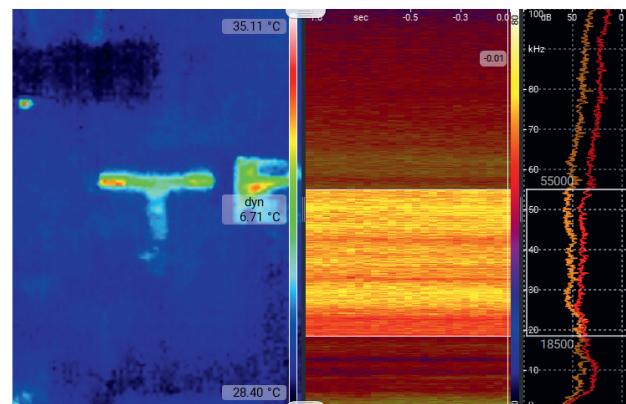

Setting new standards in hardware, performance, and accessibility

- The SONASCREEN® 2 acoustic camera generates acoustic images from the audible and ultrasonic frequency range
- The device locates (ultra)sound sources in real time and displays the results on the screen
- In addition, the camera provides acoustic feedback via headphones
- At the same time, the built-in IR module adds the functionality of a thermal imaging camera to the device
- Thus, ultrasound becomes both audible and visible - and the detection of anomalies and damaged parts is enhanced by combining acoustic and thermal images

Visualization of a leak in the acoustic image

- The combination of acoustic and thermo-graphic imaging enables a deeper understanding of the recorded events

Visualization of the same leak in the thermal image

- The parallel evaluation of acoustic and thermal images allows a more comprehensive diagnosis and analysis

Different Modes Equipped for any application

Easy

Simplified mode with reduced range of functions for easier operation

Pro

Expert mode with extended range of functions and adjustable measurement parameters

Leakage

Optimised mode for quick and easy detection of leaks incl. live loss indicator

Partial Discharge

Optimised mode for the detection of different types of partial discharges incl. live PRPD display

Network

Remote control of the camera via the included PC software*

Technical Data

General Data		Functions		
Size	31 × 16 × 5.5 cm (12.2 × 6.3 × 2.2 inch)	Features Camera	Acoustic images, optical images, FFT and spectrogram; listening to local sound (broadband or frequency-filtered); placing markers during measurement; buffer recording, trigger recording (SPL or frequency-triggered); long-term measurements (average and peak hold); time evaluation: fast, slow, impulsive	
Weight	1.5 kg (3.3 lb)			
Protection Class	IP54	Features PC-Software	Display acoustic results frame by frame; save and reload; replay in real time or in slow motion; listen to local sound. slow motion; listen to the local sound	
Operation	One- or two-handed			
Battery	~3,5 h; fully charged in 1,5 h; additional ~6,5 h with external battery (optional)	Export	Photo, video, audio, measured data	
Buttons	8 configurable + power on/off			
Tripod Mount	1/4"	Intuitive Usability	Distance setting; frequency filter (narrow band, 1/3 octave and octave), Dynamic filter and lower cut-off frequency; 3 scaling modes: Off, Auto, Smart (CREST factor)	
Operating Temperature	-20 °C to 50 °C (-4 °F to 122 °F)			
Display Size	7" / 15 cm × 9.4 cm	Languages	German, English, Spanish, Croatian, Italian, Japanese, Korean, Polish, Turkish, Chinese	
Resolution	1280 px × 800 px			
Touch Display	10 finger capacitive touch	Thermal Imager	Microbolometer Long-wave infrared, 8 µm to 14 µm 160 × 120 px 8.7 Hz <50 mK -10 °C to 400 °C (Room temperature)	
Internal Storage	1 TB M.2 SSD			
Ports				
USB A 3.0	Data export			
Ethernet	LAN (to run the PC software)*			
Audio	3.5 mm jack for headphones			
USB C	Charging and data export*			
Sensors		* This function will be activated in a future software update.		
Microphones	176 digital MEMS			
Frequency Range	1 Hz to 100 kHz			
Sample Rate	200 kHz			
Acoustic Image Resolution	100 fps			
Sound Pressure	Max. 120 dB			
Resolution	24 bit			
Detection Range	Up to 150 m (492 feet)			
Optical Camera				
Type	Digital			
Resolution	640 × 480 px with 56 fps			
Lighting	4 LEDs			
Aperture Angle	70° × 55° (FoV horizontal × vertical)			
Shutter	Global Shutter			
Additional Sensors				
ToF (Time of Flight)	Distance measurement for <1.5 m*			
GPS	Position incl. orientation*			
Power Supply				
Input	19 V with power adapter
